Remembering the concept

What's this project about?

Parents Association Management

- Free and open-source platform
- Configurable solution
- Management of children's issues
- Easy quota payments and logs
- Data exporting

Cloud Functions

- Used as the project's API
- Cover the main domains of data used in the project: cases, quotas and users/parents
- Send email notifications that can be related to the authentication and registration processes

Demo: what's been achieved so far

What's next?

- Authentication integration
- Payments tracking
- Mobile app

How will we do it?

- **Authentication:** follow Firebase's guidelines and auth services
- **Mobile app:** assess development technologies and approach
- **Payments:** tracking logs
- Regular meetings

Thanks!

Any questions?
